Super Bearing Capacity
HEAVY DUTY TRUCK SPECIAL AXLE

Three Line Six Axle Series

SIX CORE FEATURES

CLICKER HERE

- RAW MATERIAL CUTTING
- HOT ROTARY ROLLING
- HEAT TREATMENT
- HOT ROTARY ROLLING
- CNC MACHINING
- INDUCTION PROCESS

CLICKER HERE

HIGH STRENGTH ALLOY THICKENED STEEL PIPE SHAFT BODY

The shaft body with large cross-section is made of high-strength alloy. The load-carrying capacity is up to 80T

CLICKER HERE

STRONG AND DURABLE

High strength
High precision bearing

CLICKER HERE

ONE-PIECE HOT ROLLING PROCESS

Change the shaft structure
improve axle strength

CLICKER HERE

SHAFT HEAD MEDIUM FREQUENCY QUENCHING

Make the key parts of the axle
Strength and hardness

AXLE ADVANTAGE

CLICKER HERE

Mechanically connected suspension
Simple structure, compact and strength and pressure-free

Axle tires
Suitable for all types of tire hub styles, can be or high-speed tire hub and brake drum

Shafts and beams do not bend easily
The shaft body is made of high-strength alloy steel, and the beam is made of high-strength steel

ABOUT US

SHENG DIANDONG HEAVY INDUSTRY GROUP CO., LTD

Focuses on High Quality Axle Manufacturing

REASONS FOR CHOOSING US

Focuses on High Quality Axle Manufacturing

- High Quality Products
- Reasonable Prices
- Comprehensive Technical Support
- Rapid Delivery

EXCELLENT AXLE QUALITY

Focus on High Quality Axle Manufacturing

- Hot Rotary Rolling
- Overall Quenching and Quenching
- On-line Straightening
- Spray Primer
- CNC Precision Grinding
- Intermediate Frequency Quenching

MANUFACTURER OF QUALIFICATION

Focus on High Quality Axle Manufacturing

BEFORE BUYING NEED TO KNOW
